Launch price on website: 19.99 €

Game description:

Bionic Attack is a Real Time Strategy game with an asymmetric and fast paced gameplay. It takes place in a far-off solar system, on an isolated planet, the war rages on between the Democratic Alliance and the Conglomerate.

More than for the planet domination, the two factions are confronting each other for the control of resources.

The noxious air and the incessant fights have compelled the population to shelter in bunkers with endless galleries.

Solely the mechanic units are sent to the surface in order to collect resources and to build defenses.

Peace will come only with the destruction of one of the factions. Bionic Attack will immerse the player into the story of this conflict at a turning point. The emergence of a new technology in the army of the Democratic Alliance rushes the Conglomerate into a global and unprecedented offensive which leads the two factions to the ultimate battle.

Features:

- a campaign for the story with 44 missions
- independent maps for the challenge
- 6 levels of difficulty on independent maps
- asymmetric gameplay with 2 factions for a more varied gaming experience
- more than 40 achievements to unlock
- multiple graphic themes
- multiplayer mode (LAN+internet)
